

Jiffy Model 5000-12 with optional Honda upgrade

For large, growing programs, step up to the Model 5000-12 with a large capacity, 12 gallon stainless steel paint tank — less time-consuming refills and improved efficiency. Specifications are identical to the Model 5000, the most popular striper available, with a 3 1/2 HP Briggs and Stratton engine powering a high quality diaphragm compressor. The welded steel frame rolls smoothly on 10 x 4 inch pneumatic, ball-bearing wheels. The 12 gallon tank has a wide opening and a self-sealing pump unit which can be used for emergency pressurizing. Line widths fully adjustable to 6 inches. Two safety relief valves assure you of a safe piece of equipment. Shipped assembled with operating and maintenance manuals.

Specifications:

- Paint tank:** 7-gallon stainless steel, 12-gallon capacity optional
- Compressor:** Thomas Diaphragm, 3.2 CFM
- Gas engine:** 3 1/2 HP Briggs and Stratton, 2-quart fuel capacity
