

The Original
Trueline® AIRLESS SPRAY
Striper

Model 20 Trueline Striper (shown left)
has 4 Gallon Paint Tank (stainless steel)
You specify 4" or 6" spray box when ordering

Trusco Model 20 Striper

This light-weight, compact striping machine is built tough. This Trueline Striper is perfect for those small jobs. With a self-contained hand pump, just a few strokes builds sufficient pressure to stripe 120 feet per minute. Comes complete with 4 gallon stainless steel paint tank, commercial shut-off valve, 4" spray box, 9", 8 qt. funnel and strainer. Maximum operating pressure 45 psi.

Curves and radiuses are easily run by applying slight pressure on the handle. This light-weight design also allows sharper curves by simply raising the rear wheels slightly and striping around corners. Works great!
